

Irrigation controller SF – A – GUArD ©

The new irrigation controller SF-A-GUArD is the perfect complement for your irrigation system to save water. Connecting the SF-A-GUArD to the programmer, it avoids the irrigation process when the soil moisture is in excess, because of the rain or any other reason.

SF- A-GUA-rd © let you to reduce the water consume in you garden up to a 30 %

Technical specifications:

Supply	
Power supply	Desde 12 V a 24 V DC y AC
Power consumed with probe	70 mA @ 24 V, 40 mA @ 12 V.
Output with the probe connected	3 Vcc . @ 10 mA. (Ask for other consumptions)
Output relay	1, NA-NC-C, 220 V c.c./c.a., 2 A máx. / 62 V.A. máx
Weight (estimated)	0,2 Kg.
Working temperature	0° C a 50° C
Moisture	< 90 %
Protection degree with IP	IP 65
Measures	45 x 45 mm.
